

■ Kalesinterflex

FACADE CATALOG

COLORS & FINISHES

Features

Everything that must be in a porcelain slab and more...
Designed to shape the architecture of the future,
Kalesinterflex is equipped with superior features to
ensure flawless performance under any condition.

WEIGHT*

A 3mm-thick Kalesinterflex slab weighs 7kg/sqm while a 5mm-thick Kalesinterflex slab weighs 11.5kg/sqm.

FLEXIBILITY

The convex flexibility radius of a 3mm-thick Kalesinterflex Fit slab is 4.5m.

**NON-FLAMMABLE
(FLAME RESISTANT)**

Kalesinterflex is totally fire resistant and non-flammable.

CHEMICAL RESISTANCE

Kalesinterflex is resistant to chemicals (acids and bases) due to its porcelain ceramic structure and glaze layer on its surface.

CUTTING

It can be cut with standard glass, ceramic cutters and computer controlled automatic cutting machines in the required dimensions.

DRILLING

Kalesinterflex can be drilled with glass drills as well as with other automatic drilling devices.

HIGH HEAT AND FROST RESISTANCE

Kalesinterflex's surface is equipped with advanced technology to accommodate various climate conditions. It maintains its durability against sudden changes in heat and frost.

EASE OF CLEANING

Kalesinterflex has a smooth surface on which dirt does not accumulate. If required it can be cleaned with water and known cleaning agents.

HYGIENIC

Protects both outdoor and indoor, even in poorly lit environment. Hygienic; resistant to bacteria, mould and fungus. The antibacterial feature of Kalesinterflex is approved by TÜBİTAK. (The Scientific and Technological Research Council of Türkiye)

ECO-FRIENDLY

Produced with an environmentally-friendly technology, Kalesinterflex has Ecospecifier certificate. Compared to the traditional ceramic production process, its gas and dust emission is 20 times, its CO2 emission is 1000 times less.

**HIGH STAIN
RESISTANCE**

**HIGH ABRASION
RESISTANCE**

**HIGH RESISTANCE
TO UV RAYS**

**LOW WATER ABSORPTION
(NEAR ZERO)**

EVERLASTING

**HIGH
SCRATCH
RESISTANCE**

ANTI-GRAFFITI

Easy to wipe and clean pollutants like crayon, graffiti, permanent marker, board marker.

PHOTOCATALYTIC

Kalesinterflex is photocatalytic thanks to its Nano-tech coating surface. Kalesinterflex cleans itself with rain and sunlight.

*The specified weigths reflect average values and may vary depending on the product.

Kalesinterflex Parlak Yüzey

Kalesinterflex Satin Surface
Kalesinterflex Satin Yüzey

Kalesinterflex is manufactured with two different surface alternatives: matte and polished. The matte surface has matte, gleaming and structured options.

Kalesinterflex, mat ve parlak olmak üzere iki farklı yüzey alternatifleriyle üretilmektedir. Mat yüzeyi mat, parlak ve kalıplı seçeneklere sahiptir.

Türkiye's largest polished ceramic slab, Kalesinterflex may be used in numerous parts of a building.

Türkiye'nin en büyük parlak seramiği olan Kalesinterflex, yapıların birçok bölümünde tercih edilebilir.

SUADIYE KENT / İSTANBUL

We offer innovative solutions that combine aesthetics and durability in facade applications. We create an eye-catching look on the building facades with thin and large-size slabs manufactured with high technology. With surfaces that deliver the performances expected from the building shell, we protect the facades for years like the first day and take our place in environmentally friendly buildings as a sustainable construction material.

Cephe uygulamalarında estetik ve dayanıklılığı bir araya getiren yenilikçi çözümler sunuyoruz. Yüksek teknoloji ile üretilen, ince ve büyük boyutlu plakalarla binaların dış cephelerinde göz alıcı bir görünüm oluşturuyoruz. Yapı kabuğundan beklenen performanslara cevap veren yüzeylerle cepheleri yıllarca ilk günkü gibi koruyor, sürdürülebilir yapı malzemesi olarak çevre dostu binalarda yer alıyoruz.

Technology and Products

Technology

DECOTECH

The Technology Of Art

Sanatın Teknolojisi

DECOTECH technology, which stands out due to the application of special materials to the surfaces and their separation from flatly printed products, and matte or glossy materials bearing the name of granilla create a striking relief effect on the products.

Reliefs, which can be applied synchronously or independently according to different design needs and wishes, are often preferred in decorative and positive spaces.

Yüzeylere özel malzemelerin uygulanması ve düz baskılı ürünlerden ayrıştırılmasıyla öne çıkan DECOTECH teknoloji, granilya adını taşıyan mat veya parlak malzemeler, ürünlerde çarpıcı bir kabartma etkisi oluşturur.

Farklı tasarım ihtiyaçlarına ve isteklere göre senkronize veya bağımsız olarak uygulanabilen kabartmalar, dekoratif ve pozitif mekanlarda sıklıkla tercih edilir.

BODYTECH

The Technology Of Consistency

Devamlılığın Teknolojisi

BODYTECH technology, which refers to the use of salt-pepper-mas in traditional porcelain production, is constituted from finely ground mas mixtures containing homogeneous stone textures and different color shades on the surface of the products. Thanks to the special method that carries the visual effect on the surface of the product to the product structure, each edge and each cut point of the product offers a harmonious and holistic appearance with the surface.

Geleneksel porselen üretimindeki tuz biber masse kullanımını ifade eden BODYTECH teknoloji, ürünlerin yüzeyinde homojen taş dokusu ve farklı renk tonlarını içeren ince öğütülmüş masse karışımlarıyla oluşturulur. Ürünün yüzeyindeki görsel etkiyi ürün bünyesine taşıyan özel yöntemle, ürünün her bir kenarı ve kesilen her noktası, yüzeyle uyumlu ve bütünsel bir görünüm sunar.

FLOWTECH

The Technology Of Eternity

Sonsuzluğun Teknolojisi

FLOWTECH, used as a pattern tracking technology, ensures the progression of the pattern between the panels of marble-look products in particular. It creates a more impressive ambiance in wall applications in spaces. Some marble products were designed using this method. However, during the production phase, the products are produced in a combination. Practitioners should make the right choice during the covering to capture this flow. Thus, the aesthetic and design potential of the space is maximized.

Desen takip teknolojisi olarak kullanılan FLOWTECH, özellikle mermer görünümlü ürünlerin panelleri arasındaki desenin devamlılığını sağlar. Mekanlardaki duvar kullanımlarında daha etkileyici bir atmosfer oluşturur. Bazı mermer ürünleri bu yöntemle tasarlanmıştır, ancak üretim aşamasında ürünler karma şekilde üretilir. Bu akışı yakalamak için döşeme sırasında uygulayıcıların doğru seçim yapması gerekmektedir. Böylece mekanın estetik ve tasarım potansiyeli en üst düzeye çıkar.

GLOWTECH

The Technology Of Sparkle

Işıltının Teknolojisi

GLOWTECH, used as a glitter/bright luminescence technology, refers to the effect caused by the glare of micro pieces on the surface of glossy products. This special effect gives the products a more exclusive and eye-catching glow by distinguishing them from standard glossy ones. While it is described as the reflection of the natural mineral glow in some marbles on the ceramic technology, an aesthetic and elegant shine is obtained in the spaces.

Simli/parlak ışıltılar teknolojisi olarak kullanılan GLOWTECH, parlak ürünlerde yüzeydeki mikro parçaların parlamasıyla oluşan etkiyi tanımlar. Bu özel etki, ürünleri standart parlaklardan ayırarak daha özel ve göz alıcı bir ışıltıya kavuşturur. Bazı mermerlerde bulunan doğal mineral ışıltılarının seramik teknolojisine yansımış hali olarak da nitelendirilirken, mekanlarda estetik ve zarif bir parlaklık elde edilir.

OPENBOOK

The Technology Of Symmetry

Simetri Teknolojisi

OPENBOOK, used as a correspondent pattern technology, enables one module to come face to face with the other module and create a unique pattern, especially in marble-look products. This special design distinguishes both modules as A and B with different codes while allowing small pattern shifts of 1-2 cm between them. Thanks to this method, aesthetic and visual diversity is achieved in spaces, and the integrity of the design is preserved.

Karşılıklı desen teknolojisi olarak kullanılan OPENBOOK, özellikle mermer görümlü ürünlerde, bir modülün diğer modül ile yüz yüze gelerek özgün bir desen oluşturmasını sağlar. Bu özel tasarım, modüller arasında 1-2 cm gibi küçük desen kaymalarına izin verirken, her iki modülü de A ve B olarak farklı kodlarla ayırt eder. Bu yöntem sayesinde mekanlarda estetik ve görsel çeşitlilik elde edilirken, tasarımın bütünlüğü korunur.

FORMTECH

The Technology Of Sensation

Dokunun Teknolojisi

Porcelain slabs mimicking the appearance of natural stone carry aesthetic elegance to living spaces. FORMTECH shapes porcelain slabs with inspiration from nature.

Bringing surfaces an embossed and ragged feel, FORMTECH technology adds depth to spaces. Special surfaces adapted to different patterns, textures and colors offer visual richness to living spaces. It creates a more attractive and unique atmosphere in every space.

Yüzeylere kabartmalı ve pütürlü bir dokunuş hissiyatı kazandıran FORMTECH teknolojisi, mekanlara derinlik ekler. Farklı desen ve renklere uyarlanan özel yüzeyler, yaşam alanlarına görsel zenginlik sunar. Her mekanda daha çekici ve özgün bir atmosfer yaratır.
