Kasso Metal Asma Tavanlar

Kasso Metal Suspended Ceilings

Kasso metal asma tavan kaplama sistemleri, projelerin hem fonksiyonel hem de estetik gereksinimlerini karşılamayı amaçlamaktadır. Hem yeni bir inşaat için hem de mevcut bir binanın yenilenmesi için kullanılabilirler. Kasso Metal Asma Tavan Panelleri, genişletilmiş metal, standart&multi-perfore, desen kesimli ve 3D yüzeyli metal seçeneklerini çok çeşitli asma sistemleri ve panel detay çözümleri ile sunulmaktadır. Teknik ekibimizle birlikte projenize özel çözümler ve ürünler geliştirebilirsiniz.

Öne Çıkan Özellikler

- Hafiflik
- Yangına dayanım
- Isı yalıtımı
- Akustik izolasyon- akustik tekstil uygulanabilir
- Uzun yaşam döngüsü ile sürdürülebilir bir çözüm
- Yüksek trafikli alanlar için dayanıklılık
- LED aydınlatma, ısıtma/soğutma nozulları, springler ile entegrasyona uygun
- Kurulumu kolay, demonte edilebilir
- Özelleştirilebilir detaylandırma, boyutlandırma, yüzey kaplamaları mevcut
- Erişim-çıkarılabilir tavan döşemeleri gerekli durumlarda kolay erişim sağlar

Kasso metal suspended ceiling cladding systems aim to meet both the functional and aesthetical requirements of projects. They can be used both for a new construction or for a renovation of an existing building. Kasso Metal Suspended Ceiling Panels are available as expanded mesh, standard&multi perforated, pattern cut and 3D surfaced metal, along with various hanging and panel detail solutions. You can also collaborate with our technical team to develop customized solutions and products for your project.

Key Features

- Lightweight
- Fire Resistant
- Thermal insulation
- Acoustic insulation- acoustic textile applicable
- Sustainable with long-life cycle
- Durability for high traffic areas
- Integrations available with LED lighting, heating / cooling nozzles, springs
- Easy to install, demountable
- Bespoke detailing, sizing, surface finishes available
- Access- removable ceiling tiles enables easy access behind when necessary

Geniřletilmiř Metal Asma Tavanlar Expanded Mesh Metal Suspended Ceilings

Kasso'nun ürün yelpazesi, her bir projenin tasarım gereksinimlerini karřılamak üzere özelleřtirilebilir sistemler, form, geçirgenlik, çerçeve detayları, malzeme, boyut ve renkler ile çok çeřitli geniřletilmiř metal seçenekleri sunar. Mevcut geniřletilmiř metal modellerine ilave olarak projeye özel kalıp ve ürün geliştirme imkanı bulunmaktadır. Geniřletilmiř metallerin üç boyutlu formu ve farklı kullanım yönleri (tünel yönü) tavan uygulamalarında ilave bir dizayn kriteri olarak öne çıkmaktadır.

Kasso's product range offers a variety of expanded mesh options along with customisable hanging systems, form, permeability, frame details, materials, sizes and colours to meet each individual project's design requirements. Apart from the existing mesh models, there is the opportunity to develop project-specific molds and products. Three-dimensional form and way of use of expanded mesh metals can create variety of pattern in the ceiling applications.

Önerilen Ürünler / Recommended Products

GM6020
Geçirgenlik Oranı / Open Area Ratio (%): 50

GM4515
Geçirgenlik Oranı / Open Area Ratio (%): 50

GM3010
Geçirgenlik Oranı / Open Area Ratio (%): 50

GM168
Geçirgenlik Oranı / Open Area Ratio (%): 50

Tünel Yönü / Tunnel Direction

Geniřletilmiř metaller, üç boyutlu formu nedeniyle, görüş yönüne baėlı olarak açık veya kapalı bir tavan deseni oluřturmaktadır.

Due to their three-dimensional form, expanded mesh metals can create an open or closed ceiling pattern, depending on the direction of view.

Delikli Metal Asma Tavanlar Perforated Metal Suspended Ceilings

Kasso standart delikli metal paneller ürün kütüphanesi değişen delik tipleri/dağılımları, geçirgenlik oranları, farklı formlar, boyutlar, yerleşim planları için geniş bir ürün yelpazesi sunar. Kasso Delikli Metal Asma Tavanlar proje gereksinimlerine uygun asma sistemleri, formlar, büküm detayları, malzemeler ve yüzey kaplama seçenekleri ile özelleştirilebilir.

Kasso's product range offers extensive library of patterns that meet different permeability levels with varying holes, shapes, sizes, and layouts for standard perforated metal panels. Kasso Standard Perforated Metal Suspended Ceilings can be customized as per required hanging systems, form, bending details, materials and surface finishes.

3B Yüzeyli Metal Asma Tavanlar 3D Surface Metal Suspended Ceilings

Alüminyum, paslanmaz çelik, çelik, bakır, bronz, pirinç ve titanyum alaşımları için 3 boyutlu yüzeyler elde edilebilmektedir. Üst düzey yüzeyler ve özelleştirilmiş tasarımlar için çift yüzeyde derinlikli desenli metal yüzeyler tercih edilir. Son teknoloji patentli şekillendirme yöntemi, proje bazlı tasarımlar için çeşitli desen seçenekleri sunar.

3-D imensional surfaces are available for aluminum, stainless steel, steel, copper, bronze, brass, and titanium alloys. Dual depth pattern metal surfaces are preferred for high-end finishes and customised designs. Patented forming method offers various kinds of pattern options for bespoke and project-based designs.
